Diverse Shapes, Unlimited Creativity

Unilumin

UslimIII, the display with next generation technology

In today's dynamic market, effectively showcasing your brand is essential. Our technology transforms spaces into vibrant canvases that reflect your identity, engaging customers at every touchpoint. By creating immersive experiences, we invite your audience to connect with your brand on a deeper level, leaving a lasting impression. This approach not only unlocks new perspectives but also unleashes creativity, empowering your team to innovate and inspire. Let your vision shine and captivate your audience like never before.

Showing your brand

Elevate your brand by being outstanding

Create an experience

Transform environments to engage audiences and create unforgettable experiences.

Unlock vision Unleash Creativity

Unlock potential and inspire creativity with stunning visual displays that captivate imaginations

Showing your brand

Unilumin is here to support your brand's growth. We recognize the dedication it takes to stand out in a competitive landscape. Our advanced visual solutions, featuring free splicing and optional MIP technology, help you connect with your audience, creating engaging experiences that highlight your brand's essence and leave a lasting impact. The flexible design of UslimIII allows for seamless integration into various environments, enhancing your brand's visibility and appeal.

Create an experience

This innovative display solution engages audiences and creates lasting interactions. Its advanced visuals transform environments, and with optional MIP technology, you enhance these experiences even further, delivering stunning visuals and exceptional color consistency that leave a lasting impression.

Unlock Vision Unleash Creativity

Transform your brand's narrative by exploring new possibilities that spark creativity. Engaging your audience through immersive experiences empowers your team to innovate and bring fresh ideas to life, ultimately enhancing your brand's impact and visibility.

Retail Settings

Engage shoppers and boost sales with MIP displays that enrich your brand identity and provide captivating experiences in retail spaces.

Automotive Dealership

Use MIP screens to create dynamic vehicle presentations, showcase key features, and offer customers an engaging and interactive shopping experience.

Fine Dining Restaurant

Displaying delicious animations boosts appetite and brand impact, attracting customers and enhancing their dining experience.

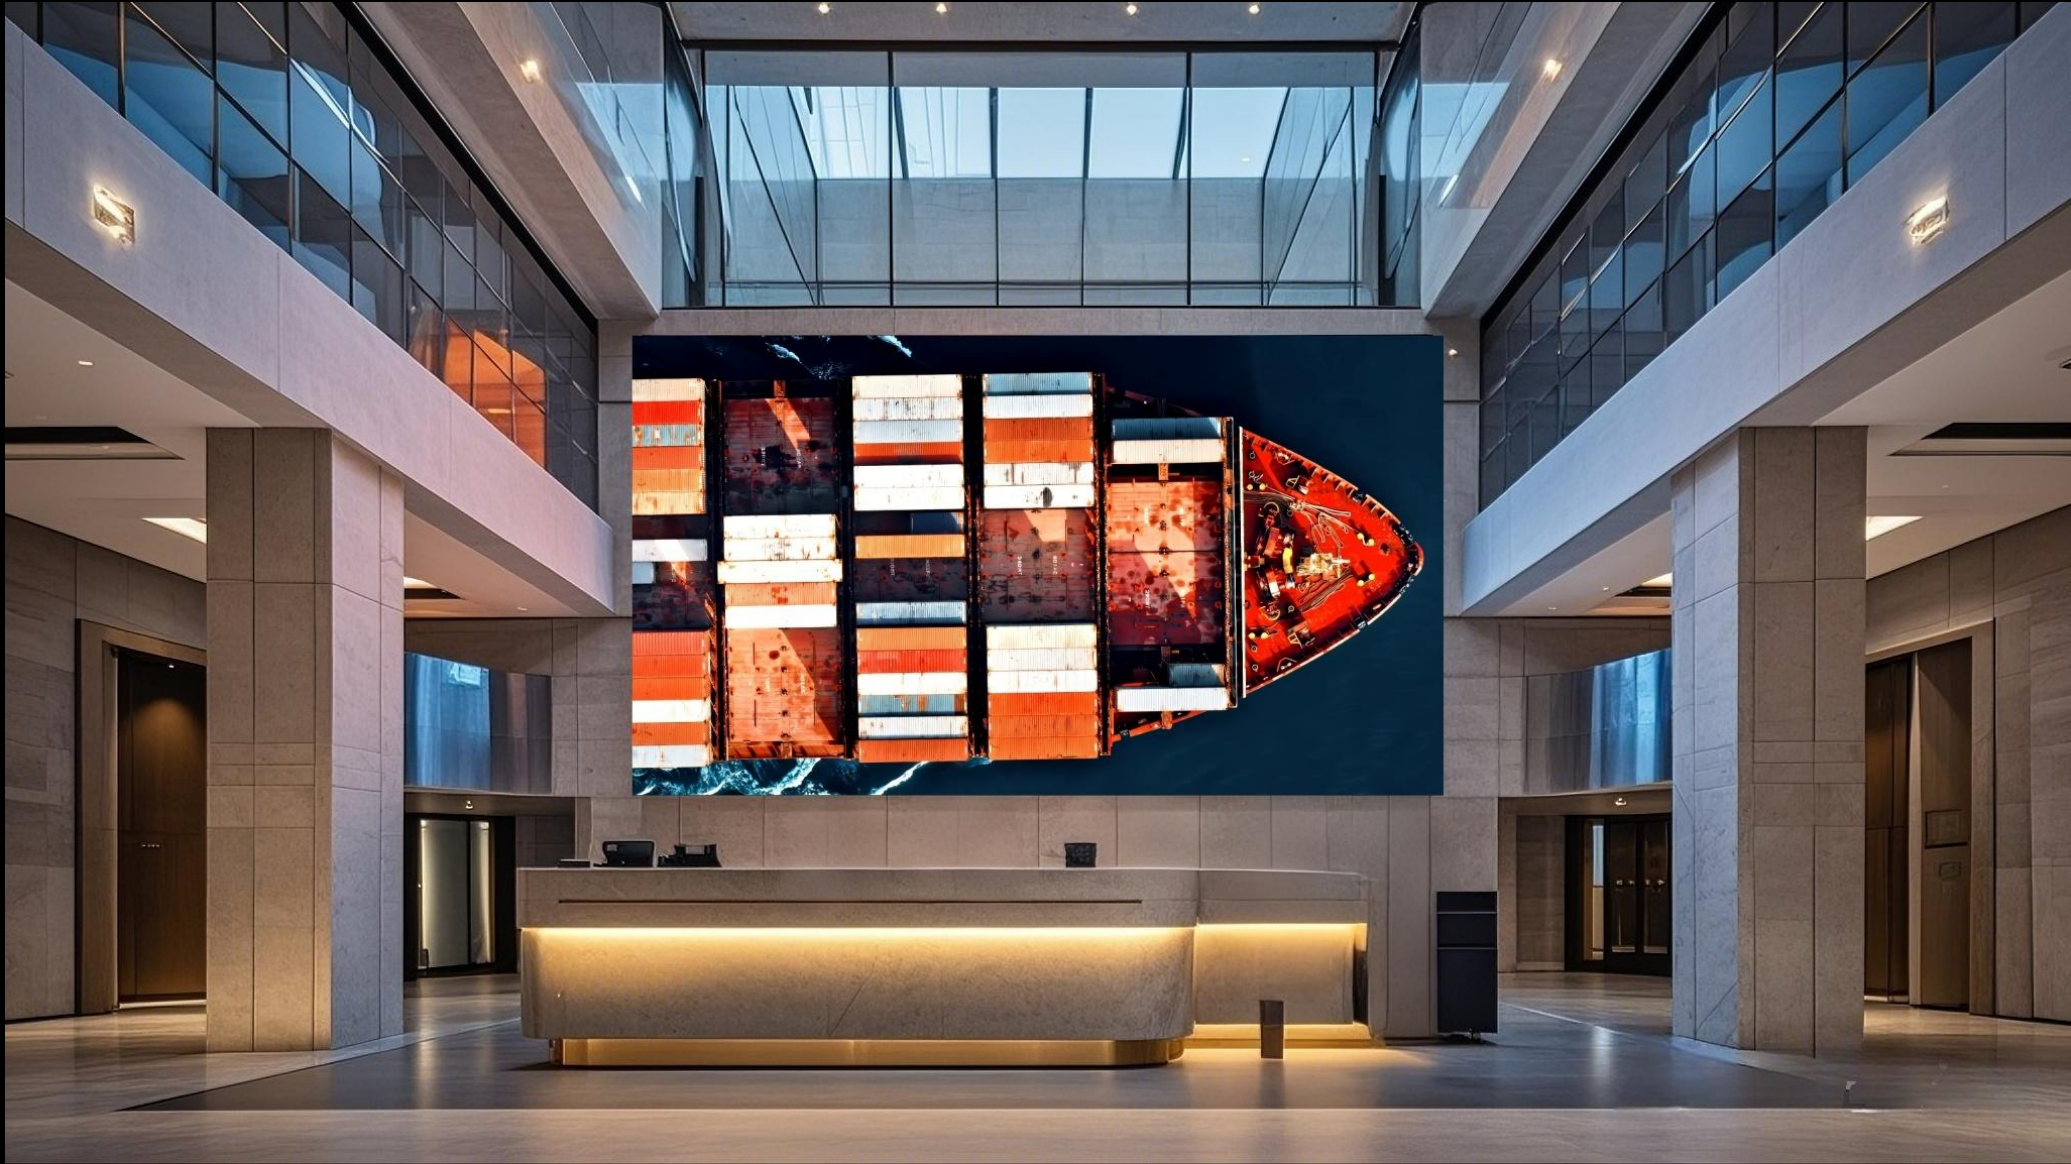

Hospitality TV

Craft memorable experiences for guests as they arrive in the lobby, explore the dining area, enjoy entertainment options, or unwind in their elegant accommodations.

Business

Enhance the corporate lobby with LED screens that display dynamic content, convey brand messages, and create an inviting atmosphere for visitors.

Exhibition hall & Gallery

Transform the exhibition hall and gallery into an engaging space where visitors are captivated by stunning visuals, interactive displays, and immersive storytelling.

Healthcare Setting

Use LED displays to present crucial health information clearly, while sharing patient stories and promoting wellness initiatives in an engaging way.

Features

The UslimIII provides outstanding versatility, serving multiple purposes within a single screen, ideal for branding and interactive experiences. Additionally, its MIP version delivers exceptional picture quality with advanced processing technology, producing vibrant visuals that captivate audiences and enhance engagement.

MIP and EBL+

Deep black levels are vital for revealing fine details. The UslimIII MIP boosts contrast with smaller LEDs for deeper blacks and clearer details. Advanced coatings ensure dark scenes are vivid, creating a striking visual experience that highlights every detail.

EBL+ (Enhance black level+)

Deep black

Low Moiré

Anti-glare

Anti-reflections

Soft display

Low touch marks

Ultra-high consistency over 99%

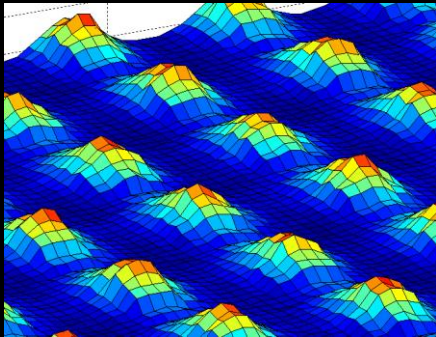

The mix bin process in MIP production enables over 99% consistency and provides a wide viewing angle without color distortion.

Soft display and true colors

A display offers clear colors and a gentle appearance, enhancing visual comfort while making content more inviting to viewers.

Usim III MIP

Traditional SMD

EBL+ coating protections

Comparing with other SMD products (without surface coating), UslimIII MIP provides surface coating treatments against dust, water and static electricity.

Module dust resistance

The UslimIII and UslimIII MIP modules feature a special anti-dust design, ensuring they remain clean and pristine over time.

In contrast, dust can accumulate on magnetic column areas of other products, forming stains.

Other optional functions

Pixel Error Detection

Power Backup

GOB
SMD Indoor brightness

Module Safety Ropes

Signal Backup

HDR
